T - Tame the “Student ePortfolio” Beast by Templatizing Courses and Leveraging the Magic of the Canvas API by Travis Thurston & Kenneth Larsen of Utah State University

Rob Mayfield

May 9 at 11:22am

9 9

USU transformed the use of Canvas courses through templatized ePortfolios for Pre-Service teachers. By leveraging the Canvas API, these portfolios can be created at the click of a button by supervising teachers. Additionally, they can be used to track progress and to report outcomes.

Building: Westgate

Room: Bison 3-5

Track: Higher Ed

Come check us out, and we'll help you "TAME THE BEAST!" Plus, you can get a picture with Superhero Kenneth (http://elearningindustry.com/5-keys-to-rapid-course-development-in-canvas-using-custom-tools) , and get his autograph ;)

Travis - YAY! I am glad you are doing a session on your amazing templates. I think you should dress up as Thor because you wield the hammer of the Canvas template that smashes bad design!

Thor is my favorite :) That would be pretty cool! Kenneth and Elisa Taylor will actually be presenting on the custom tools at templates on Thursday 10:15-10:45 " (https://instcon.canvas.net/courses/79/discussion_topics/805) UNLEASHING THE POWER OF CANVAS THROUGH TEMPLATING TOOLS AND INTERACTIVE UI WIDGETS" (https://instcon.canvas.net/courses/79/discussion_topics/805) This presentation is showing how we used the custom tools and a custom LTI integration to create student eportfolios. Hopefully you can catch both presentations :)

Do your templates work in draft state?

Travis Thurston (https://instcon.canvas.net/courses/79/users/1463)

Jun 9, 2014

Anthony, we will be releasing Kennethware 2.0 at InstructureCon which will include additional features from the original Canvas Custom Tools release, and... drum roll please... Kennethware 2.0 is draft state compatible!
